

Tomorrow's Technology Today

Low Voltage Electronic Specialist

TIPS FOR VIEWING THIS PRESENTATION:

1. Take advantage of the built-in **Table of Contents** by clicking on the **palette icon** (show/hide navigation pane) located just to the right of the printer icon. Or you can go up to **WINDOW...** then select **Show Bookmarks**.
2. After selecting from the menu on the left, click on the palette icon once more and the selected section will open full screen for easy viewing.
3. To go to a website on the Internet from this pdf file, right click on the web address, then select **"Open Weblink in Browser"**.

Home Theater Surround Sound Speaker Cable Options

American Industries has several options to make your Home Theater dreams come true. We can do everything from surround sound speaker wiring to installing several complete system options as well. There are no two **Home Theater** installations that are identical. Some homeowners are quite satisfied with a surround sound setup utilizing hidden in-wall speakers. Some people want a complete theater built in their home, which mimics the audio and sound found in their local movie houses.

So the equipment and installation will vary depending on the degree of technical capability one requires in their **Home Theater** system. All we want to do here is to show you some options for Home Theater, speakers, speaker cable, and equipment racking.

The first thing you will have to do is to choose the type of speaker cables you want.

Fully Designed and Approved for In-Wall Use

For most cables, the higher the class number, the better the cable. Most cities in the U.S. require in-wall cable to be Class 2, at minimum, to meet electrical codes. All the cable on this page is fully UL Class 3 rated for maximum protection. If a cable isn't UL rated, it should only be used in outside walls.

Standard 16-Gauge Surround Sound Speaker Cable

Monster™ THX Certified 14-Gauge Surround Sound Speaker Cable

THX-Certified for Truly Professional Performance

The two-conductor versions (#8519C and #8525C) have the additional benefit of being THX certified. This extraordinarily hard-to-achieve certification assures that the cables transfer dialogue, music and sound effects exactly as the film's sound editors intended. Cable #8525C is THX-certified for cable runs up to 30 ft. for front speakers and 60 ft. for surrounds. Cable #8519C is THX-certified for cable runs up to 24 ft. for front speakers and 48 ft. for surrounds.

Monster™ Powerline™ THX Certified 14-Gauge Speaker Cable

Made by Monster Cable, this cable is THX-Ultra certified by the engineers at Lucasfilms™ Skywalker Ranch to transfer signals and reproduce sound exactly as movie sound editors intended.
